LAKE TEST-BED

Lake Sapanca is a fresh water lake, 5 km from the SUASIS R&D laboratory.

**SUASIS has a test-bed facility and a small boat at the Lake.
Broad band acoustic tests/calibrations and a 3 node net for underwater communication experiments.**

For static tests there are 3 bottom mounted nodes working at 20 kHz-40 kHz Tx/Rx net for communication tests.

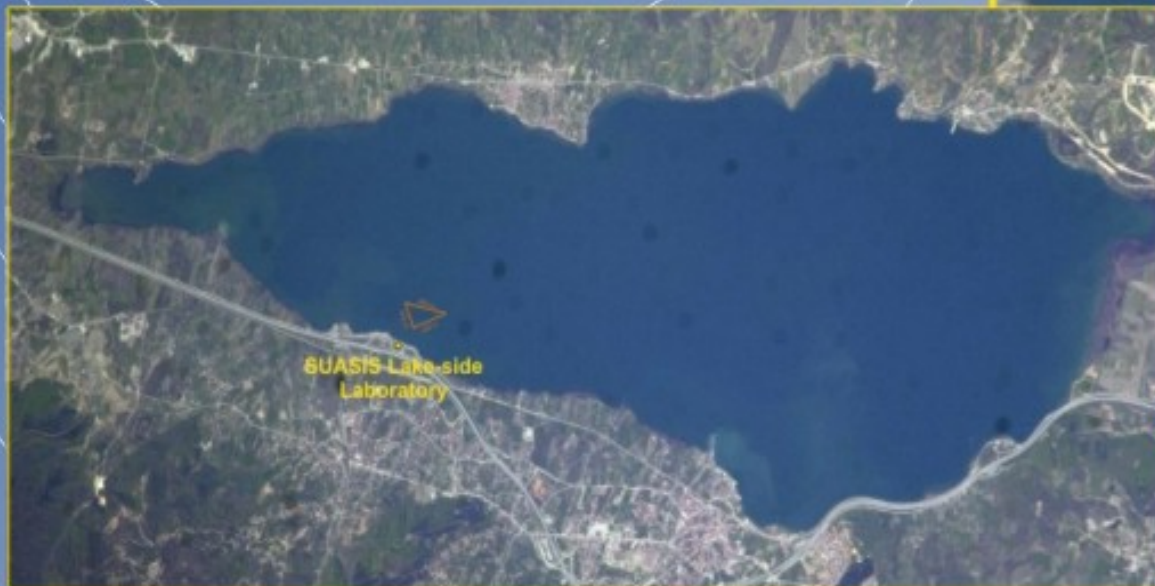

For dynamic measurements AUV equipped with communication hardware.

SUASIS LAKE TEST-BED

- 3, 20-40 kHz Nodes
- 1, AUV
